How long have you lived in Palm Beach County?	69 years

JOBS

With unemployment rate going down I feel that adequate jobs are available and I believe that anyone working should start off with minimum wage or higher.

TALENT

Helping with job fairs and making pamphlets available. Advertisement is a great tool in getting the word out.

BUSINESS CLIMATE

Yes I believe women that own their own businesses should be show cased to let others know what is happening in and around our community.

AFFORDABLE HOUSING

There's not enough affordable houses and even with Palm Beach County passing the bond to build affordable houses there will still be a shortage.

TAXES

I don't believe in increasing taxes because we should be great stewards when it comes to spending other people money.

COLLABORATION

I think in any business we should talk and get other people opinions and in doing so we can brainstorm and come up with better ways and solutions in working smarter and not harder. In my line of work I am a strong believer in education, and I like the idea of continuing education.

WOMEN IN THE WORKFORCE

I am gender neutral when it comes to hiring and individual, I believe the best applicant should be hired for the job.

WORKPLACE CULTURE

It should be an atmosphere where we feel comfortable in our surrounding. I have supported policies whether male or female they should receive the same amount of pay.

OUR COMMUNITY

I believe that in any community there is always room for improvement. We can build on what we have to make lives better. Boynton is headed in the right direction.

Is there anything else you would like to add?

The business community is one of the catalysts that add and bring growth to a city.
